## Glossary Terms and Definitions

**"Programme"** - A programme of education and training refers to any process by which learners may acquire knowledge, skill or competence. It includes courses of study or instruction, apprenticeships, training and employment. A programme offers learners the learning opportunities by which they may attain educational goals (expressed as the intended programme learning outcome) by learning activities in a learning environment. A programme is normally comprised of modules. A programme leading to a major award will normally require a 'cohesion generating' process which integrates constituent modules so that the minimum intended programme learning outcomes are supported. The cohesion generating process should establish the epistemological and cultural identity of the programme. It should also coordinate alignment of activities with the minimum intended programme learning outcomes and introduce learners to the broader community of practice to which they aspire.
